ADAPTIVE CONTROL

Adaptive pole-polacement control with filtered states and steady-state disturbance rejection. F.K. Omani p12
Model reference adaptive control via the minimisation of output error and weighting control input. C.-L. Hwang and B.-S. Chen p231
State-space adaptive control through a modified bootstrap algorithm for parameter and state estimation. M.S. Ahmed and N. Sait p215

ALGORITHMS

Adaptive pole-polacement control with filtered states and steady-state disturbance rejection. F.K. Omani p12
Application of system identification techniques to modelling a turbogenerator. E. Swidenbank and B.W. Hogg p113
Continuous-time approach to self-tuning control: algorithm, implementation and assessment. A. Patra and G.P. Rao p333
Decoupling multivariable self-tuning controller for varying time delays. F. Mahieddine and A.S. Morris p209
Error recovery points management for dynamically identified recoverable atomic actions. K. Zieliński p28
General hybrid orthogonal functions and some potential applications in systems and control. A. Patra and G.P. Rao p157
Higher-order iterative learning control algorithm. Z. Bien and K.M. Huh p105
Improved condition for the optimality of decentralised control for large-scale systems. T.-C. Yang, N. Munro and A. Brameller p44
New computationally efficient formula for backward-pass fixed-interval smoother and its *UD* factorisation algorithm. K. Watanabe and S.G. Tzafestas p73 d331
Optimal modal controller design by entire eigenstructure assignment. M. Saif p341
Reduced-order observer with parameter adaption for fast rotor flux estimation in induction machines. R. Nilsen and M.P. Kaźmierkowski p35
Robust recursive least-squares method with modified weights for bilinear system identification. H. Dai and N.K. Sinha p122
Self-tuning automatic voltage regulators for a synchronous generator. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p252
Self-tuning control in the presence of periodic disturbance. K.W. Lim, C.C. Hang and C.H. Lee p98
State-space adaptive control through a modified bootstrap algorithm for parameter and state estimation. M.S. Ahmed and N. Sait p215
State-space self-tuning regulators for general multivariable stochastic systems. L.S. Shieh, Y.L. Bao and F.R. Chang p17

BIOLOGICAL EFFECTS

Pole-assignment self-tuning control of blood pressure in postoperative patients: a simulation study. N.E. Mansour and D.A. Linkens p1

BIOMEDICAL APPLICATIONS

Pole-assignment self-tuning control of blood pressure in postoperative patients: a simulation study. N.E. Mansour and D.A. Linkens p1

CLOSED-LOOP SYSTEMS

Adaptive pole-polacement control with filtered states and steady-state disturbance rejection. F.K. Omani p12
Cost of uncertainty about controlled objects. O.L.R. Jacobs p177
Model reference adaptive control via the minimisation of output error and weighting control input. C.-L. Hwang and B.-S. Chen p231
Optimal modal controller design by entire eigenstructure assignment. M. Saif p341

COMPUTER APPLICATIONS

Design and computation of near-optimal stable observers for bilinear systems. Y. Maghsoodi p127
New computationally efficient formula for backward-pass fixed-interval smoother and its *UD* factorisation algorithm. K. Watanabe and S.G. Tzafestas p73 d331

CONTROL EQUIPMENT AND APPLICATIONS

Decoupling multivariable self-tuning controller for varying time delays. F. Mahieddine and A.S. Morris p209
Pole-assignment self-tuning control of blood pressure in postoperative patients: a simulation study. N.E. Mansour and D.A. Linkens p1
Reduced-order observer with parameter adaption for fast rotor flux estimation in induction machines. R. Nilsen and M.P. Kaźmierkowski p35
Self-tuning controllers for turbogenerator excitation and governing systems. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p238
State-space self-tuning regulators for general multivariable stochastic systems. L.S. Shieh, Y.L. Bao and F.R. Chang p17

CONTROL SYSTEMS

A class of discrete-time models for a continuous-time system. T. Mori, P.N. Nikiforuk, M.M. Gupta and N. Hori p79
Approach to pole assignment by centralised and decentralised output feedback. M. Tarokh p89
Continuous-time approach to self-tuning control: algorithm, implementation and assessment. A. Patra and G.P. Rao p333
Cost of uncertainty about controlled objects. O.L.R. Jacobs p177
Damping ratio of linear uncertain discrete-time systems. C.B. Soh, Y.H. Lim and T.C. Lim p298
Decoupling in nonlinear systems: from linearity to nonlinearity. L.C.J.M. Gras and H. Nijmeijer p53
Disturbance rejection in nonlinear systems: examples. K.M. Passino p317
Fuzzy systems identification. C.-W. Xu p146
General hybrid orthogonal functions and some potential applications in systems and control. A. Patra and G.P. Rao p157
Generalised H_∞ multivariable controllers. M.J. Grimble p285
Higher-order iterative learning control algorithm. Z. Bien and K.M. Huh p105
Homotopy method for solving algebraic Riccati equations. S.-S. Wang and C.-T. Pan p68
Identification of boiler models. P.K. Chawdhry and B.W. Hogg p261
Improved condition for the optimality of decentralised control for large-scale systems. T.-C. Yang, N. Munro and A. Brameller p44
Linear feedback approach to the stabilisation of uncertain discrete systems. A.A. Bahnasawi, A.S. Al-Fuhaid and M.S. Mahmoud p47
Lower bounds for the stability margin of linear continuous systems based on weighted performance criteria. P. Agathoklis and V. Sreeram p63
Model reduction of continuous-time systems using a modified Routh approximation method. C.-S. Hsieh and C. Hwang p151
Model reference adaptive control via the minimisation of output error and weighting control input. C.-L. Hwang and B.-S. Chen p231
New canonical form for pole placement. F. Blanchini p314
New linear parameterisation of all stabilising compensators for single-input/single-output plants. G. Celentano and G. De Maria p225
Pole-assignment self-tuning control of blood pressure in postoperative patients: a simulation study. N.E. Mansour and D.A. Linkens p1
Robust control of discrete systems. C.S. Berger p165
Robust pole-placement for uncertain interval systems. Y.C. Soh p301
Simplified design approach for decentralised controllers of large-scale systems. G. Feng p171
State-space adaptive control through a modified bootstrap algorithm for parameter and state estimation. M.S. Ahmed and N. Sait p215

CONTROL THEORY

Application of extended Luenberger observer for flux and rotor time-constant estimation in induction motor drives. T. Orlowska-Kowalska p324
Continuous-time approach to self-tuning control: algorithm, implementation and assessment. A. Patra and G.P. Rao p333
Cost of uncertainty about controlled objects. O.L.R. Jacobs p177
Damping ratio of linear uncertain discrete-time systems. C.B. Soh, Y.H. Lim and T.C. Lim p298
Decoupling in nonlinear systems: from linearity to nonlinearity. L.C.J.M. Gras and H. Nijmeijer p53
Disturbance rejection in nonlinear systems: examples. K.M. Passino p317
Error recovery points management for dynamically identified recoverable atomic actions. K. Zieliński p28
Fuzzy systems identification. C.-W. Xu p146
Generalised H_∞ multivariable controllers. M.J. Grimble p285
Improved condition for the optimality of decentralised control for large-scale systems. T.-C. Yang, N. Munro and A. Brameller p44
Linear feedback approach to the stabilisation of uncertain discrete systems. A.A. Bahnasawi, A.S. Al-Fuhaid and M.S. Mahmoud p47
Multivariable Nyquist self-tuning: a general approach. B. Kouvaritakis and J.A. Rossiter p189
Self-tuning control in the presence of periodic disturbance. K.W. Lim, C.C. Hang and C.H. Lee p98
Self-tuning controllers for turbogenerator excitation and governing systems. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p238
Simplified design approach for decentralised controllers of large-scale systems. G. Feng p171

CYBERNETICS AND ROBOTICS

Decentralised PD and PID robotic regulators. Y. Bestaoui p133

DESIGN

Design and computation of near-optimal stable observers for bilinear systems. Y. Maghsoodi p127
Optimal modal controller design by entire eigenstructure assignment. M. Saif p341
Simplified design approach for decentralised controllers of large-scale systems. G. Feng p171

DIGITAL CONTROL

State-space self-tuning regulators for general multivariable stochastic systems. L.S. Shieh, Y.L. Bao and F.R. Chang p17

ERRORS AND ERROR ANALYSIS

Error recovery points management for dynamically identified recoverable atomic actions. K. Zieliński p28

FEEDBACK

Approach to pole assignment by centralised and decentralised output feedback. M. Tarokh p89
Linear feedback approach to the stabilisation of uncertain discrete systems. A.A. Bahnasawi, A.S. Al-Fuhaid and M.S. Mahmoud p47
Parametric state-feedback control for arbitrary eigenvalue assignment with minimum sensitivity. T.J. Owens and J. O'Reilly p307

FILTERS AND FILTERING

New computationally efficient formula for backward-pass fixed-interval smoother and its *UD* factorisation algorithm. K. Watanabe and S.G. Tzafestas p73 d331

GENERATORS

Self-tuning automatic voltage regulators for a synchronous generator. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p252

INDUCTION MOTORS

Application of extended Luenberger observer for flux and rotor time-constant estimation in induction motor drives. T. Orlowska-Kowalska p324

INDUSTRIAL APPLICATIONS OF POWER

Identification of boiler models. P.K. Chawdhry and B.W. Hogg p261

LINEAR NETWORKS

Quadrature path-counting method for the disturbance decoupling problem in linear multivariable systems. R. Collins p203

LOAD AND VOLTAGE REGULATION

Self-tuning automatic voltage regulators for a synchronous generator. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p252

MATHEMATICAL TECHNIQUES

A class of discrete-time models for a continuous-time system. T. Mori, P.N. Nikiforuk, M.M. Gupta and N. Hori p79
Application of system identification techniques to modelling a turbogenerator. E. Swidenbank and B.W. Hogg p113
Continuous-time approach to self-tuning control: algorithm, implementation and assessment. A. Patra and G.P. Rao p333
Cost of uncertainty about controlled objects. O.L.R. Jacobs p177
Decoupling multivariable self-tuning controller for varying time delays. F. Mahieddine and A.S. Morris p209
Error recovery points management for dynamically identified recoverable atomic actions. K. Zieliński p28
Fuzzy systems identification. C.-W. Xu p146
General hybrid orthogonal functions and some potential applications in systems and control. A. Patra and G.P. Rao p157
Higher-order iterative learning control algorithm. Z. Bien and K.M. Huh p105
Homotopy method for solving algebraic Riccati equations. S.-S. Wang and C.-T. Pan p68
Identification of boiler models. P.K. Chawdhry and B.W. Hogg p261
Lower bounds for the stability margin of linear continuous systems based on weighted performance criteria. P. Agathoklis and V. Sreeram p63
Model reduction of continuous-time systems using a modified Routh approximation method. C.-S. Hsieh and C. Hwang p151
Multivariable Nyquist self-tuning: a general approach. B. Kouvaritakis and J.A. Rossiter p189
New canonical form for pole placement. F. Blanchini p314
Parametric state-feedback control for arbitrary eigenvalue assignment with minimum sensitivity. T.J. Owens and J. O'Reilly p307
Quadrature path-counting method for the disturbance decoupling problem in linear multivariable systems. R. Collins p203
Reduced-order observer with parameter adaption for fast rotor flux estimation in induction machines. R. Nilsen and M.P. Kaźmierkowski p35
Self-tuning control in the presence of periodic disturbance. K.W. Lim, C.C. Hang and C.H. Lee p98
State-space adaptive control through a modified bootstrap algorithm for parameter and state estimation. M.S. Ahmed and N. Sait p215

MATRIX ALGEBRA

Decoupling in nonlinear systems: from linearity to nonlinearity. L.C.J.M. Gras and H. Nijmeijer p53
Homotopy method for solving algebraic Riccati equations. S.-S. Wang and C.-T. Pan p68
New canonical form for pole placement. F. Blanchini p314
Parametric state-feedback control for arbitrary eigenvalue assignment with minimum sensitivity. T.J. Owens and J. O'Reilly p307
Predictive H_∞ model reference optimal control law for SIMO systems. M.J. Grimble p273
Quadrature path-counting method for the disturbance decoupling problem in linear multivariable systems. R. Collins p203
Reduced-order observer with parameter adaption for fast rotor flux estimation in induction machines. R. Nilsen and M.P. Kaźmierkowski p35
Robust control of discrete systems. C.S. Berger p165

MEASUREMENT AND MEASURING

Lower bounds for the stability margin of linear continuous systems based on weighted performance criteria. P. Agathoklis and V. Sreeram p63

MODELLING

A class of discrete-time models for a continuous-time system. T. Mori, P.N. Nikiforuk, M.M. Gupta and N. Hori p79
Application of system identification techniques to modelling a turbogenerator. E. Swidenbank and B.W. Hogg p113
Fuzzy systems identification. C.-W. Xu p146
Identification of boiler models. P.K. Chawdhry and B.W. Hogg p261
Model reduction of continuous-time systems using a modified Routh approximation method. C.-S. Hsieh and C. Hwang p151
Model reference adaptive control via the minimisation of output error and weighting control input. C.-L. Hwang and B.-S. Chen p231
Predictive H_∞ model reference optimal control law for SIMO systems. M.J. Grimble p273

MOTORS

Engine control system using a cylinder pressure sensor. Y. Hata, K. Ikeura, T. Morita and T. Abo p84

MULTIVARIABLE CONTROL SYSTEMS

Decoupling multivariable self-tuning controller for varying time delays. F. Mahieddine and A.S. Morris p209
Generalised H_∞ multivariable controllers. M.J. Grimble p285
Multivariable Nyquist self-tuning: a general approach. B. Kouvaritakis and J.A. Rossiter p189
Parametric state-feedback control for arbitrary eigenvalue assignment with minimum sensitivity. T.J. Owens and J. O'Reilly p307
Quadrature path-counting method for the disturbance decoupling problem in linear multivariable systems. R. Collins p203
State-space self-tuning regulators for general multivariable stochastic systems. L.S. Shieh, Y.L. Bao and F.R. Chang p17

NONLINEAR SYSTEMS

Application of extended Luenberger observer for flux and rotor time-constant estimation in induction motor drives. T. Orlowska-Kowalska p324
Decentralised PD and PID robotic regulators. Y. Bestaoui p133
Decoupling in nonlinear systems: from linearity to nonlinearity. L.C.J.M. Gras and H. Nijmeijer p53
Disturbance rejection in nonlinear systems: examples. K.M. Passino p317
Robust recursive least-squares method with modified weights for bilinear system identification. H. Dai and N.K. Sinha p122

NUMERICAL ANALYSIS

Decentralised PD and PID robotic regulators. Y. Bestaoui p133
Higher-order iterative learning control algorithm. Z. Bien and K.M. Huh p105
Homotopy method for solving algebraic Riccati equations. S.-S. Wang and C.-T. Pan p68
New computationally efficient formula for backward-pass fixed-interval smoother and its *UD* factorisation algorithm. K. Watanabe and S.G. Tzafestas p73 d331
Robust recursive least-squares method with modified weights for bilinear system identification. H. Dai and N.K. Sinha p122

OPTIMAL CONTROL

Design and computation of near-optimal stable observers for bilinear systems. Y. Maghsoodi p127
Generalised H_∞ multivariable controllers. M.J. Grimble p285
Improved condition for the optimality of decentralised control for large-scale systems. T.-C. Yang, N. Munro and A. Brameller p44
Optimal modal controller design by entire eigenstructure assignment. M. Saif p341
Predictive H_∞ model reference optimal control law for SIMO systems. M.J. Grimble p273

OPTIMISATION

Simplified design approach for decentralised controllers of large-scale systems. G. Feng p171

PERTURBATION THEORY

Robust control of discrete systems. C.S. Berger p165

POLES AND ZEROS

Adaptive pole-polacement control with filtered states and steady-state disturbance rejection. F.K. Omani p12
Approach to pole assignment by centralised and decentralised output feedback. M. Tarokh p89
New canonical form for pole placement. F. Blanchini p314
New linear parameterisation of all stabilising compensators for single-input/single-output plants. G. Celentano and G. De Maria p225
Robust pole-placement for uncertain interval systems. Y.C. Soh p301

POLYNOMIALS

Approach to pole assignment by centralised and decentralised output feedback. M. Tarokh p89
General hybrid orthogonal functions and some potential applications in systems and control. A. Patra and G.P. Rao p157
New linear parameterisation of all stabilising compensators for single-input/single-output plants. G. Celentano and G. De Maria p225
Predictive H_∞ model reference optimal control law for SIMO systems. M.J. Grimble p273
Robust control of discrete systems. C.S. Berger p165
Robust pole-placement for uncertain interval systems. Y.C. Soh p301
Self-tuning control in the presence of periodic disturbance. K.W. Lim, C.C. Hang and C.H. Lee p98

PROCESS CONTROL

Multivariable Nyquist self-tuning: a general approach. B. Kouvaritakis and J.A. Rossiter p189

ROBOTICS

Decentralised PD and PID robotic regulators. Y. Bestaoui p133

SIMULATION

Robust recursive least-squares method with modified weights for bilinear system identification. H. Dai and N.K. Sinha p122

STABILITY

Design and computation of near-optimal stable observers for bilinear systems. Y. Maghsoodi p127
Engine control system using a cylinder pressure sensor. Y. Hata, K. Ikeura, T. Morita and T. Abo p84
Linear feedback approach to the stabilisation of uncertain discrete systems. A.A. Bahnasawi, A.S. Al-Fuhaid and M.S. Mahmoud p47
Lower bounds for the stability margin of linear continuous systems based on weighted performance criteria. P. Agathoklis and V. Sreeram p63
New linear parameterisation of all stabilising compensators for single-input/single-output plants. G. Celentano and G. De Maria p225
Robust pole-placement for uncertain interval systems. Y.C. Soh p301

SYNCHRONOUS MOTORS

Application of extended Luenberger observer for flux and rotor time-constant estimation in induction motor drives. T. Orlowska-Kowalska p324

TRANSDUCERS

Engine control system using a cylinder pressure sensor. Y. Hata, K. Ikeura, T. Morita and T. Abo p84

TURBOGENERATORS

Application of system identification techniques to modelling a turbogenerator. E. Swidenbank and B.W. Hogg p113
Self-tuning controllers for turbogenerator excitation and governing systems. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p238

VEHICLES AND TRANSPORTATION

Engine control system using a cylinder pressure sensor. Y. Hata, K. Ikeura, T. Morita and T. Abo p84

VOLTAGE REGULATORS

Self-tuning automatic voltage regulators for a synchronous generator. A.S. Ibrahim, B.W. Hogg and M.M. Sharaf p252
